COURSES

INTRODUCTION

We are excited to announce that Nottingham Free School Sixth Form (NFS-16) opens in September 2019 offering A-Level courses to students aged between 16 and 19 years.

The combination of specialist A-Level teaching and our wider enrichment curriculum gives the very best education and preparation for further study at university or application for higher apprenticeships.

Our working week incorporates lessons, independent study, enrichment and voluntary activities alongside time with personal mentors.

We would love you to join us in Year 12. Find out more about NFS-16 in this prospectus, online, at our open evening or visit us during the working day.

WELCOME

I would like to warmly welcome you to our sixth form as part of Nottingham Free School.

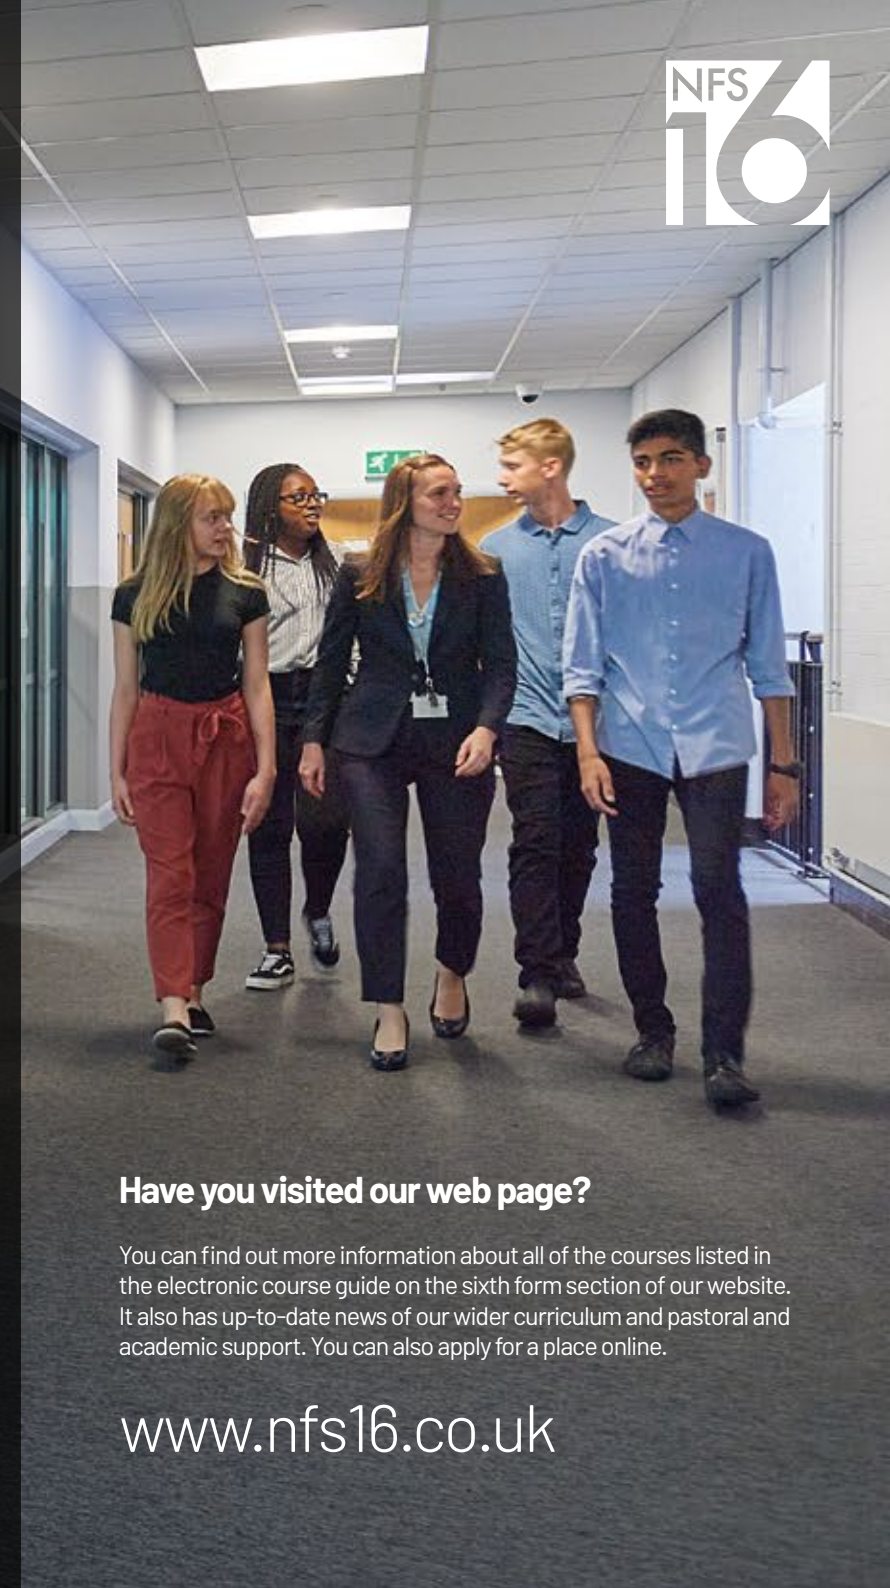

It is with great excitement that we develop into post-16 and a privilege to deliver this level of education for our community. Our vision is to fully prepare all of our students for their next step in life.

NFS-16 builds on our strong foundations of quality teaching and wider enrichment opportunities to ensure that all of our students are able to apply to university, an equivalent higher level apprenticeship or make a smooth transition into employment.

Our school community is a welcoming environment where we know every individual enabling us to provide the best support for academic and personal development. This will apply whether you have studied with us for the past five years or are just joining us in Year 12.

I look forward to welcoming you into our sixth form community.

Jenny Brown
Head of School

Have you visited our web page?

You can find out more information about all of the courses listed in the electronic course guide on the sixth form section of our website. It also has up-to-date news of our wider curriculum and pastoral and academic support. You can also apply for a place online.

www.nfs16.co.uk

ACHIEVEMENT

Student achievement is at the heart of everything that we do. Our high expectations and expertly planned lessons will ensure strong learning.

Progress will be checked regularly to ensure all students are on track and guidance will be given for further study tasks outside of the classroom.

Continuing to develop our students as independent learners will help them access their full potential and prepare them well for their next steps.

VISION

Our vision is to ensure all our students achieve a good career through university or equivalent training.

Our high aspirations combine the key strands of strong achievement, employability skills and consideration towards others which is summed up in our motto 'work hard, be kind'.

These principles, which guide our school community, enable our students to reach this goal and be well-rounded citizens who are highly desired by higher education and employers.

CURRICULUM AND WIDER SKILLS

Our curriculum goes beyond the suite of facilitating A-Level courses on offer. Alongside these, students will follow an enrichment curriculum giving them the essential skills required for university applications and the workplace.

They will be able to broaden their studies through the Extended Project Qualifications (EPQ), enter the Duke of Edinburgh Awards (up to Gold level) and participate in a variety of voluntary and work experience activities.

NFS-16 COMMUNITY

Students are expected to contribute to the NFS community and play an active role in supporting their peers or younger students in a variety of ways. This can be through working with students in subject curriculum classes, tutoring sessions, lunch time clubs or enrichment lessons.

There will also be a variety of ways to contribute to our work with the wider community through various volunteering opportunities. As a sixth form student body, you will also have leadership opportunities to run clubs and societies for your peers.

TEACHING

All of our staff are skilful and passionate subject specialists who are kept up-to-date with subject knowledge and awarding exam body requirements.

All students will have taught lessons in each of their subjects along with independent study periods and access to additional learning resources.

SUPPORT AND GUIDANCE

Our strong pastoral care is a highly-regarded aspect of Nottingham Free School and this continues at sixth form level.

A personal tutor will monitor progress, achievement and approach to learning on a regular basis.

In addition, students will have a weekly PSHE session where information about relevant life skills will be taught and discussed.

LIFE AFTER NFS

The majority of our students are expected to progress onto higher education or a higher level apprenticeship.

All students will be provided with information and guidance enabling them to make a well-informed choice as to their chosen pathway.

We already have strong links with a number of universities giving students a flavour of university life. Expert advice from our experienced staff will be provided to support all students individually with their university or apprenticeship application.

The combination of our high expectations for academic learning and the development of wider employability skills is critical for supporting applications at this level.

Students wishing to enter directly into employment will also have support with their job applications.

HOW TO APPLY

Entry requirements

To study A-Levels at NFS-16 you need to have achieved the following general entry requirements:

- Grade 4 or above in English and Mathematics plus three other GCSE (or equivalent qualifications) at grade 5 or above
- You must have achieved a grade 5 in the subject that you wish to study at A-Level

Some courses have specific or higher entry requirements in particular subjects as follows:

- **Biology / Chemistry / Physics:** Grade 5 or above in GCSE Mathematics, Grade 5 or above in all three separate sciences or Grade 6 in Science Trilogy
- **Economics:** Grade 5 or above in GCSE Mathematics
- **Mathematics:** Grade 6 or above in GCSE Mathematics
- **Further Mathematics:** Grade 7 or above in GCSE Mathematics
- **Physical Education:** you should be competing at club-level or above
- **Spanish:** Grade 6 or above in GCSE Spanish

We know that choosing the right place to further your studies is a big decision and we would encourage you to come and visit us before making a final decision.

We look forward to hearing from you soon.

APPLY ONLINE

We are currently accepting applications for September 2019 for Year 12 students.

You can apply directly through our website:

www.nfs16.co.uk/apply

If you have any queries regarding the application process, please contact us via email at contact@nfs16.co.uk.

COURSES

The following A-Level courses are offered:

Art and Design

Biology*

Chemistry*

Economics

English Language and Literature*

English Literature*

Further Mathematics*

Geography*

History*

Mathematics*

Religious Studies

Physical Education

Physics*

Spanish*

* These are known as 'facilitating A-Levels' and are accepted at all universities, including those in the Russell Group. These are often required by many university courses.

For more detailed information on each of the individual courses listed above, please visit the Course Guide section on our website

www.nfs16.co.uk/courses

Please note: Insufficient student numbers applying for any of the courses listed above may result in that particular course not running. In this eventuality, prospective students will be guided to an appropriate alternative.
